POD Chief of Staff looks toward future

When Col. Donald R. Pawlowski assumed duties as Deputy Commander of Pacific Ocean Division (POD) in August, he did more than change location from his previous assignment as Director of Public Works (DPW) at Fort Leonard Wood, Mo.—he actually reversed roles and found himself no longer a consumer of Army Corps of Engineers services, but a provider.

“I was very excited about joining POD,” he said. “While with DPW I had an opportunity to do partnering and to improve relations with Kansas City District. General Ballard has done a lot to bring all engineers together and he gave me an opportunity to participate. Now I’m able to apply what I’ve learned to matters of concern to the Corps.”

This is not, however, Pawlowski’s first experience with POD. During his nearly 25 years in the Army, he said that he has served throughout POD’s area of responsibility. He was Army liaison officer with the 30th Naval Construction Regt. in Guam; chief of Facilities Engineers at the Cold Regions Test Center at Fort Greely, Alaska; Facilities Engineer staff officer with U.S. Forces, Japan; and was commander of the 802nd Engineer Battalion at Camp Humphreys, Republic of Korea.

As Chief of Staff, Pawlowski said that he has been involved in both the physical and functional separation of POD and HED. He is in the position of keeping both the commander and department heads informed so that the organization as a whole can “excel in the execution of its mission.” Pawlowski also has assumed a leadership role in trying to develop a picture of the future for the Division as a whole.

“We see opportunities to become more forward-looking

as a corporate body,” said Pawlowski. “General Strock is a member of the campaign team at USACE looking at strategic plans for the Corps. In addition to attaining the Corps’ Vision, we are concerned with long-term results and are setting the stage for our successors.”

Outlook...

Continued from page 2

first to existing members of the District. This realignment is organized with the intent that no one will lose a job or grade, although some might have to change duties.

Achieving stability in personnel will promote our success in other areas as we confront different challenges in 1999. In January and February we will have a HQUSACE Command Inspection. By October, we hope to begin a major shift of offices, physically separating the Division staff from the District and moving everyone out of Building T-1, which will then be torn down.

I believe 1999 will be a pivotal year for the District’s future. Whether the District will shrink or grow during the next five years will largely be determined by how well we improve our pro-

cesses and promote new opportunities. How well we are able to work together in teams to support our customers will decide the District’s fate. I urge you to participate in these efforts and to continue doing great work to accomplish the District’s current missions.

The beginning of a New Year normally calls forth resolutions of self-improvement. My ambitions for the District include greater customer satisfaction, more efficiency and value in project delivery, more effective financial management, more consistent recognition and care of individuals and more investment in the individual professional and leadership skills that are the basis for the District’s future success. My personal goal is to get to know better the many wonderful people of this organization.

I hope you share these goals and can join me in looking with optimism to the New Year. Best wishes to you and your family for the holidays.
